## EMPLOYMENT IN NEW SOUTH WALES

(1) The following estimates are based on the National Register of 1939, the Civilian Register of 1943, and the Occupation Survey of 1945, and returns supplied monthly by employers for purposes of Commonwealth pay-roll taxation and by governmental authorities. (2) The Pay-roll Tax returns show the number of employees whose names appeared on the last pay-roll of the month, irrespective of whether they were actually working at the end of the month. (3) Workers in rural industry, females in private domestic service, members of the full-time defence forces at home or abroad, and National Service Trainees in camp are excluded.

The figures in Tables 2 and 3 are published as reasonably reliable estimates with the following qualifications:—

(a) Investigation now proceeding may show the need for some revision in the monthly aggregates.

It is not anticipated, however, that any such revision will affect the trends shown by the figures in Table 2. Some revision will be necessary in the totals and trends in employment for individual industries (particularly manufacturing) in Table 3. Estimates of employment by various classes of factory have been discontinued for the present.

(b) Owing to the time incidence of call-ups for short periods of National Service Training since August, 1951, and in a lesser degree to enlistments in the permanent and/or oversea forces, some aspects of the changes in numbers of total civilian employees cannot be understood unless considered in conjunction with changes in numbers of defence personnel who are omitted from the figures in Tables 2 and 3, viz., (i) members of the full-time defence forces, and (ii) National Service Trainees in camp. Particulars of (i) are not available for New South Wales, but the number of National Service Trainees in camp in New South Wales at the end of each month since August, 1951, was as follows:—

1951: August, 3,600; September, 3,600; October, 3,600; November, 700; December, 1,000.

1952: January, 4,200; February, 4,400; March, 4,500; April, 4,500; May, 4,500; June, 4,900.

## BUILDING ACTIVITY IN NEW SOUTH WALES

Note.—1. "Value" represents the estimated cost of the building when completed (exclusive of the land).

2. Building is classified as "government" or "private" according to ownership.
3. The value of building approved is the value of permits issued by local government councils, plus the value of contracts let or work commenced and day labour projects authorised by governmental authorities.
4. Buildings on rural holdings are for the most part excluded.

## 45. Index of Value of Shares on Sydney Stock Exchange

The index relates to the value of ordinary shares on the Sydney Stock Exchange of principal companies (excluding banks), whose business is conducted wholly or largely in New South Wales. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made for changes in capital structure.

### 50. Australian Export Price Index

Compiled by Commonwealth Statistician from prices of twenty commodities constituting at present about 80 per cent. of all Australian exports. The prices are multiplied by the average annual exports (production in the case of gold) in the years 1933-34 to 1935-36.

Base : Average 3 years ended June, 1939=100

### 51. Wholesale Price Index : Basic Materials and Foodstuffs

Compiled by Commonwealth Statistician. Prices are drawn mainly from Melbourne sources. Apart from home-produced building materials, coal, and one or two minor commodities, the index may be deemed to represent movements of wholesale prices of basic materials in most Australian markets.

From August, 1950, to 30th June, 1951, a bounty was paid on raw wool purchased for local manufacture. The effective price, that is the open market (auction room) price less bounty, has been used in calculating the index numbers in this table.
